Doctorate

Supervisor	Prof. Dr. Olivier Gires (Director of ENT Research and Laboratory Director of Molecular Oncology, LMU/ University Hospital)
Description	My research emphasises on the effects of signalling pathways, related cellular programs, and their clinical outcome. Currently, I am working on a transcriptome analysis using *R*. Further, a predictive model for risk assessment of tumor recurrence implementing machine learning shall be developed.

Master's Thesis

Supervisors	Prof. Dr. Marcus Groettrup (Chair of Immunology, University of Konstanz), Dr. Ulf Grawunder (CEO, NBE-Therapeutics)
Description	I elaborated an enzymatic coupling strategy to manufacture highly homogenous and site-specifically conjugated Antibody-Drug-Conjugates for targeted cancer therapy.
